Hi Andre and team,

Thanks for the call yesterday.

Based on the 135k loan applications per month, approximately 1.6 million per year, I have worked out a ballpark license quote below which also includes the base support under Essential Success Plan. I have also included details of the 3 success plan options for your comparison.

A couple of follow up items:

1. Please send over your ask around the security concern, your existing BPMN diagrams and any related architecture for my team to review ahead of our next meeting
2. Please see the Camunda MNDA template attached - it's a short 2 pager to help expedite this process, please review and share the signatory details
3. As for GCP marketplace, yes Camunda is available through a private offer

For Camunda license, do note that:

- We do not charge for users, unlimited users may access the platform
- We do not limit how many steps there are in a process, and we **do not** factor in sub-processes
- You get access to all Camunda platform features including AI components
- There is no difference in costing between C7 Enterprise and C8 Enterprise
